Native Portuguese, B1 English, basic Spanish.

Summary

I spent 5 years inside spreadsheets. Now I build the systems that replace them.

Developer with more than five years of experience across accounting, payroll and HR, administration, and financial control. At Astcon, I started as a filing clerk and became the person in charge of payroll and HR for more than 60 client companies, coordinating the office team. Now, in financial control at Grupo Zen, I check invoices before payment, handle purchasing, and develop in-house systems that have cut process time considerably and errors even more. I build software from real pain points at work.

Experience

Feb 2026 – present

Grupo Zen group of more than 20 companies (fuel, hospitality, vehicle rental, real estate)

Financial Control Assistant

- Work directly with the controller and handle requests from the group's directors. Develop in-house systems that have cut process time considerably and errors even more.
- Check invoices and boletos (bank payment slips) for a large share of the companies before payment. Caught fake boletos, invoices for other companies, and invoices issued under the group's tax ID (CNPJ) with no order, registering them as unrecognized transactions, and contacted suppliers to correct incomplete invoices.
- Keep the LMC (mandatory fuel stock ledger) for 3 stations, reconciled with Veeder-Root (deliveries, sales, evaporation, and stock), and audit fuel deliveries at one station and the TRR (fuel distributor), the basis for my calculation of vehicle rental and drivers' freight.
- Handle purchasing for some of the group's companies (quotes, negotiation, and supplier selection) and changes to the fleet rental contracts. Reconcile fuel advances and Mercado Livre purchases in AutoSystem.

Sep 2025 – Jan 2026

Fazenda Novo México agribusiness

Administrative Assistant

- Recommended by a client of Astcon, joined to take over the farm's administrative management, succeeding the manager.
- Staff pay (overtime, days off, and absences), entering supplier invoices and boletos in Jira, tracking spreadsheets, and reconciling the backlog.
- Supported the management of in-house teams and of the contractors installing the irrigation system, with meetings and tracking of the construction work.
- Left when the group centralized the farms' administration at headquarters.

Feb 2021 – Sep 2025

Astcon Assessoria Contábil accounting firm

Office Assistant

- Started as a part-time filing clerk; moved through accounting (journal entries, bank reconciliation, and month-end close) and became the person in charge of payroll and HR.
- Full payroll and HR routines for more than 60 client companies in Domínio (payroll software): hiring, dismissals, leave, termination settlements, and Brazilian payroll filings (INSS, FGTS, eSocial, DCTFWeb). Served the clients and their employees.
- In Domínio, automated payroll calculation, filing of each payroll in the client's folder, and payroll submission to eSocial. Rolled out Onvio and trained the clients, sometimes at their own sites.
- Coordinated the office team, trained new hires, and was in charge of the office when the owner was away.

Projects

9 projects published on GitHub, 8 with a live demo. Tests checked on 9 Nov 2026.

ArtMaker alyssom-fernandes.github.io/ArtMaker

1080×1920 deal flyers for WhatsApp Status, in a single HTML file with Canvas; saves on the device itself. 33 tests on GitHub Actions. JavaScript, HTML5 Canvas, localStorage, IndexedDB, Web Share API, node:test, GitHub Actions

UnifyData alyssom-fernandes.github.io/UnifyData-Web
Closes employees' credit purchases recorded in AutoSystem: matches them against HR and generates the payroll deduction spreadsheet by company, plus CSV and an A4 report. Web and Python versions; 17 + 23 tests on GitHub Actions. JavaScript, SheetJS, PDF.js, ExcelJS, Python, Streamlit, pandas, thefuzz, openpyxl, GitHub Actions

DeepChat alyssom-fernandes.github.io/DeepChat
A chat where DeepSeek answers and ChatGPT reviews the answer with a verdict and, when there is an error, a revised version; no server, with API keys stored encrypted in the browser. 65 tests on GitHub Actions. JavaScript (ES modules), DeepSeek API, OpenAI API, marked, DOMPurify, Web Crypto, node:test, GitHub Actions

Praxis praxis-af618.web.app
Corporate purchasing from request to payment, in 7 stages: quotes, approvals, installments, and deadlines, with 6 access roles and 14 notification events. 15 unit tests and 30 Firestore rules tests. JavaScript (ES modules), Firebase (Firestore, Auth, Storage, Hosting), PWA, Cloud Functions, node:test, GitHub Actions

FlowTrack flowtrack-afn.vercel.app
Personal finances with automatic categorization in 3 layers (rules, cache, and a language model); imports statements from 4 banks, OFX, and CSV. 250 backend tests, 8 frontend, and 40 end-to-end. React 19, TypeScript, FastAPI, Supabase/PostgreSQL, Language model, pytest, Playwright

AudiStock alyssom-fernandes.github.io/AudiStock/app.html
Stock audits: counting on a phone (keyboard, barcode scanner, or camera) with an offline queue, closing against the ERP balance, and a report of shortages and overages in PDF, Excel, and CSV. 84 unit and database tests and 46 end-to-end. JavaScript, Supabase (PostgreSQL + Auth), IndexedDB, PWA, jsPDF, ExcelJS, SheetJS, BarcodeDetector, node:test, PGlite, Playwright, GitHub Actions

Fuel Mind controle-entradas-posto.web.app
Tracks fuel deliveries and freight: imports the electronic invoice (NF-e XML), calculates vehicle rental and the drivers' freight, and closes the month in PDF or Excel. 120 unit tests and 25 Firestore rules tests. JavaScript, Firebase, Chart.js, jsPDF, SheetJS, node:test, GitHub Actions

AlertSignal github.com/alyssom-fernandes/AlertSignal
Permit and license expirations for multiple companies, with daily email alerts from 90 days before and higher urgency at 30 and 7; reports in PDF, Excel, and CSV. 62 tests on GitHub Actions. Python, Flask, SQLite, APScheduler, pandas, openpyxl, Jinja2, JavaScript, unittest, GitHub Actions

Docke docke-two.vercel.app
Electronic document management for multiple companies: OCR, compliance deadlines, legal retention, and a hash-chained audit trail. 83 backend tests and 6 end-to-end. React 19, TypeScript, Vite, Tailwind CSS, FastAPI, PostgreSQL (RLS), Supabase, Tesseract, pytest, Playwright

Skills

Technologies: JavaScript, TypeScript, Python, SQL (PostgreSQL, Supabase), Excel: reading and generating, pandas, React, FastAPI, Flask and SQLite, Firebase, Automated tests, CI (GitHub Actions), PDF and Excel reports, Authentication and access roles, Dashboards and metrics, Scheduled jobs, Offline and sync, Real time, Language model APIs, OCR (Tesseract), NF-e (XML).

Business: Payroll and HR: eSocial, DCTFWeb, FGTS, INSS (Domínio and Onvio); Accounting routines: journal entries, bank reconciliation, and month-end close; Financial control: reconciliations, invoice checks, and fraud prevention (AutoSystem, WebPosto); Fuel: LMC, Veeder-Root, delivery audits, rental and freight calculation; Purchasing: quotes, negotiation, purchase approvals in Jira, fleet contracts; System implementation and user training (Onvio); Data analysis in Excel: PivotTables, VLOOKUP/XLOOKUP, SUMIFS, COUNTIFS, IF, conditional formatting, data validation; Team coordination and training.

Education

Technology degree (Tecnólogo) in Systems Analysis and Development, undergraduate program, Uniasselvi, completed in 2026.

AFN Systems, Alyssom Fernandes
